ACKNOWLEDGMENT

We are greatly indebted to our Project guide, **Ms. Savita S. Wagre** for her able guidance, and we would like to thank her for her help, suggestions, and numerous helpful discussions.

We gladly take this opportunity to thank **Dr. A.M. Rajurkar** (Head of Computer Science and Engineering, MGM's College of Engineering, Nanded).

We are heartily thankful to **Dr. G. S. Lathkar** (Director, MGM's College of Engineering, Nanded) for providing facilities during the progress of the Project and for her kind guidance and inspiration.

Last but not least, we are also thankful to all those who helped directly or indirectly in the complete and successful development of this Project.

With Deep Reverence,

Tejas Modi [148]

Yash Bachewar [128]

ABSTRACT

The Second-Hand Car Selling Website is an online platform designed to facilitate the buying and selling of pre-owned vehicles. The system connects individual car sellers, dealers, and potential buyers through a user-friendly, secure, and efficient interface. It allows sellers to list their vehicles with detailed specifications, images, pricing, and location, while buyers can browse, filter, and compare listings based on various criteria such as make, model, price, city, and year of manufacture. Key features include user authentication, car listing management, advanced search filters, secure contact between buyers and sellers, and admin oversight for data validation and fraud prevention. This website addresses the common challenges in the second-hand car market, such as lack of trust, limited visibility, and inefficient communication, by creating a transparent and accessible digital marketplace.

The system is built using modern web technologies and is optimized for performance, scalability, and ease of use. It benefits individuals looking to sell their cars quickly and buyers seeking affordable and verified vehicle options.
